2. MARKET REVIEW	3 - 6
3. ADMINISTRATIVE ACTIONS	7 - 10
4. STATISTICAL SERIES	11 - 30
(a) Highlights	11
(b) Supply and Disposition Summary: January 1964	12
(c) Disposition and stocks: January 1964 and 1963 To end February 1964 and 1963	13 13
(d) Mainland Production and Quota Charges: January 1964 and 1963	14
(e) Refiners and Importers receipts by Source of Supply: January 1964 and 1963	14
(f) Status of Quotas and Balances As of March 31, 1964	15 - 16
(g) Deliveries by States: January 1964 January 1964 and 1963	17 18
(h) Deliveries by types of products or business of buyers, fourth quarter, and calendar year, 1963, with comparisons (1) Sugar (2) Corn sirup and dextrose	19 - 23 24 - 27
(i) Sugar prices by Areas	28
(j) Sugar prices compared with corn sweetener prices	29
(k) Refined sugar production and stocks	30
5. RECEIPTS OF RAW AND DIRECT-CONSUMPTION SUGAR, BY PORTS OF ENTRY AND AREAS OF ORIGIN 1963	31 - 32
6. SUPPLEMENT TO VOL. II SUGAR STATISTICS--MAINLAND CANE AREA, FLORIDA, HAWAII, PUERTO RICO, AND VIRGIN ISLANDS	33 - 39

## RAW SUGAR PRICES

### MARKET REVIEW

On the basis of preliminary reports, sugar deliveries for continental United States consumption during the first quarter of 1964 totaled 1,881,000 tons or 136,000 tons less than the 1959-63 average for this period. However, physical deliveries of sugar, including constructive deliveries, during January-March 1964 amounted to 2,068,000 tons or only 13,000 less than the average deliveries during January-March 1959-63.

While the rate of deliveries during the first quarter of 1964 might indicate a reduction in invisible stocks (those held by secondary distributors and users) of as much as 75,000 tons, such stocks remain at a relatively high level. It is estimated that those year end stocks increased about 100,000 tons during each of calendar years 1962 and 1963.

Cane refiners' receipts during the first quarter of 1964 were about 350,000 tons less than for the same period last year. This reduction in receipts represented the working-off of a part of the large stocks held at the end of 1963. As of March 28, 1964, refiners reported total stocks of 1,076,000 tons, 70 percent or more than 400,000 tons higher than the average of 632,000 tons for total stocks held by refiners on March 31 for the five year period 1959-63.

The reduction of over 300,000 tons in refiners stocks since the beginning of the year represents a reduction in raw sugar stocks since refined stocks were slightly higher at the end of March. Raw stocks as of March 28, 1964, were reported as totaling 709,000 tons, or 116 percent higher than the 1959-63 average of 329,000 tons of raw sugar stocks held by refiners at the end of March.

Beet sugar deliveries during the first quarter of this year totaled 497,000 tons which would leave a balance of 1,635,000 tons undelivered from the January 1, 1964 effective inventory, or about 200,000 tons more than the balance for the same 1963 period. In most recent years the January-September deliveries of beet sugar have approximated the amount of the effective inventory. During the five year period 1959-63, deliveries during January-September were 98.6 percent of the effective

inventory on January 1. In 1963, January-March deliveries totaled 559,000 tons, which left a balance of 1,439,000 tons from the effective inventory at the beginning of 1963 for delivery in the second and third quarters. Beet sugar processors will have available over 200,000 tons more sugar to market during April-September 1964 than the 1,395,000 tons delivered during the same months last year.

In addition to the 497,000 tons of beet sugar reported as deliveries during the first quarter of 1964 there were 170,000 tons of 1963 constructive deliveries that were physically delivered during this period or a total of 667,000 tons. Physical deliveries of beet sugar during January-March 1963 totaled 585,000 tons.

On April 6 refiners announced a further decline of 0.35 cent in the wholesale quotation for cane sugar in the Northeast to 11.25 cents per pound. The average quotation in this territory for the period January 1 - April 15 was 12.34 cents per pound.

Wholesale quotations for refined sugar as of April 15 were as follows:

	<u>Cane</u>	<u>Beet</u>
	<u>Cents per pound in 100 lb. paper bags</u>	
Northeast	11.25	
New York Metropolitan Area	11.15	
Southeast	10.50	
Gulf	10.30	
Eastern beet		9.90
Chicago-West	10.10	9.90
Lower Pacific Coast	10.55	10.55
Northwest-Intermountain	10.50	10.50

The average spot quotation for raw sugar, duty paid and delivered at New York for the period January 1 to April 15 was 8.12 cents per pound and on April 15 the price was 7.20 cents. On a comparable basis, the average was 1.72 cents per pound below the world price average and the April 15 New York price was 2.05 cents below the April 15 world quotation.

Hawaiian sugar production as of April 9, 1964 totaled 248,000 short tons, raw value, or 80,000 tons above last year's production at approximately the same date.

Through April 12, 1964, Puerto Rican sugar production was about 625,000 short tons, raw value, or 56,000 tons above last year's production to the same date.

Reports of Cuban production through March 31 circulated in early April placed such production at 1,950,000 metric tons, only 575,000 tons above the official figure for production through February. For a time this created considerable apprehension as to its implications on the size of the total Cuban crop. Later, it became widely accepted that the production figure actually represented production through March 15 rather than through March 31. A trade publication about mid-April reported that Cuban production through March 1964 totaled 2,505,000 metric tons or 218,000 tons more than during the same period last year.

The Preparatory Committee of the International Sugar Council met in London on March 23, 1964 to consider the final draft of the committee report to the Council on the basic provisions of a new international sugar agreement. The Committee made a thorough study of all of the proposals submitted in previous sessions and the report is now in process of final preparation.

The final report will be **distributed to** all countries in the near future for study prior to the Council meeting in June. While the changes, if any, proposed for a new agreement are unknown, it has been widely known for more than a year that the developing countries desire a greater share of the world market and a higher price range to improve their income from sugar exports. How to accomplish this presents problems. For instance, high price objectives could be self-defeating by stimulating possible uneconomic production in both exporting and importing countries.

The United States Department of Agriculture issued a press release on March 5 revising its estimate for 1963-64 world sugar crop to 59.4 million short tons, an increase of 700,000 tons above the Department's first official estimate release in November of 1963. Detailed estimates by individual countries will be released in June.

A private sugar statistical organization (F. O. Licht) has released its first estimate of plantings for the 1964 sugar beet crop in both Western and Eastern Europe. Total Western European plantings are put at

1,927,000 hectares for 1964 compared with 1,788,315 as its second estimate for last year. For Eastern Europe the 1964 figure is 5,653,000 hectares compared with 4,533,500 as its second estimate for 1963. For all of Europe the total is 7,580,000 hectares as the first estimate for 1964 which is 20 percent higher than the 6,321,815 as the second estimate for 1963.

ADMINISTRATIVE ACTIONSDate announcedNature of action

March 10,  
1964

Announcement that the entire 39,799-ton quota deficit made available for importation from Western Hemisphere countries (press release USDA 756-64, dated March 6, 1964) has been committed for importation as follows:

Dominican Republic - 34,733 short tons, raw value  
and  
Guatemala 5,066 short tons, raw value

March 17,  
1964

Determination of fair and reasonable prices for the 1963-64 crop of sugarcane in Puerto Rico. (See March 20, 1964 Federal Register).

March 26,  
1964

Three commitments -- totaling 14,585 acres estimated to yield 29,300 tons of sugar -- from the national sugarbeet acreage reserve for use by new producers in localities where existing beet sugar factories will be substantially expanded effective for the 1964 crop.

Only those farms on which sugarbeets were not grown for delivery to a processor for the extraction of sugar in any of the three crop years 1961, 1962 and 1963 are eligible for this reserve acreage.

Today's action completes the commitment of the national sugarbeet acreage reserve which will be made for new facilities and expansion through 1965. (See April 1, 1964 Federal Register).

Date announcedNature of action

March 27,  
1964

Proposed revision of requirements which must be met to import sugar or liquid sugar into the continental United States.

The proposal is contained in a "Notice of Proposed Rule Making," which is scheduled for publication in the April 1 Federal Register. Interested persons are invited to submit written data, views, or arguments regarding the proposal to the Director of the Sugar Policy Staff not later than April 21.

Copies of the notice containing the proposed revisions are available from the Sugar Quota Branch, Policy and Program Appraisal Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D. C. 20250, (See April 1, 1964 Federal Register).

March 31,  
1964

Amendment 3 to Sugar Determination 842.2 revises the definition of local producing area with respect to abandonment and crop deficiency payments in the Beet Sugar Area. (See March 31, 1964 Federal Register).

March 31,  
1964

Amendment 1 to Sugar Determination 874.16 provides for tolling arrangements between processors for the 1963 crop of Louisiana sugarcane. (See March 31, 1964 Federal Register).

April 3,  
1964

Announcement that consideration is being given to the need for establishing farm proportionate shares (acreage allotments) for the 1965 sugarcane crop in the Mainland Cane Sugar Area (Florida and Louisiana).

Date announcedNature of action

April 3, (cont'd)  
1964

Simultaneously, the Department announced that consideration also is being given to limiting 1964 acreage credit, for use in establishing 1965-crop proportionate shares, to those acreages planted to sugarcane on or prior to April 15, 1964.

Pursuant to the Sugar Act, proportionate shares are required in any domestic area when the production of sugar from a crop will be greater than the quantity needed to enable the area to meet its quota and provide a normal carryover inventory.

A public hearing on 1965 proportionate shares will be held, at a time and place to be announced later by the Department, to receive the views and recommendations of interested persons on this subject.

Views and comments on proposal on 1964 acreage credit may be submitted in writing to the Director, Sugar Policy Staff, Agricultural Stabilization and Conservation Service, U. S. Department of Agriculture, Washington, D.C. 20250, postmarked no later than midnight May 1, 1964. (See April 9, 1964 Federal Register).

April 3,  
1964

Determination of fair and reasonable wage rates for sugar beet work in all producing regions, effective today, April 3. These rates will continue in effect until amended, superseded, or terminated. (See April 7, 1964 Federal Register).

April 17,  
1964

Extended from April 15 to May 1, 1964, the date by which 1964-crop sugarcane may be planted in the Mainland Cane Sugar Area and acreage credit given for use in establishing 1965-crop proportionate shares (acreage allotments).

Date announcedNature of action

April 17  
1964

Announced the commitment of the balance of the sugarbeet acreage reserve available under the Sugar Act. One commitment (of 20,000 acres) was made to farms in the Phoenix, Arizona locality, and the other (33,000 acres) was made to farms in Aroostook County, Maine. Both of the new plants will begin operations for the 1966 crop.

STATISTICAL SERIES IN THIS ISSUEHIGHLIGHTS

1. February 1964 sugar deliveries for continental U. S. consumption, 582,000 short tons, raw value, down about 59,000 from January 1964 and down 23,000 tons from February 1963. January-February 1964 deliveries, 1,223,000 short tons, raw value, down about 112,000 tons from the January-February 1963 period. Final data for January 1964 deliveries 641,000 -- previously published preliminary as 609,000 tons.

2. Primary distributors' stocks February 29, 1964 were 2,580,879 short tons, raw value, up 454,000 tons from a year earlier and up 2,000 tons from end January 1964. During February beet processors' stocks increased by about 30,000 tons, mainland sugarcane processors' stocks by about 34,000 tons, and importers of direct-consumption sugar stocks by about 3,000 tons; refiners' stocks decreased by about 65,000 tons.

3. Charges to 1964 quotas to March 31, 1964 were 2,526,911 short tons, raw value, leaving a balance of 7,273,308 short tons, to be supplied within the 9,800,000 ton total.

4. Regionally, January deliveries, 1964 as compared with 1963, were down to 4 regions and up to 1 -- Decreases: North Central 26.7 percent, Western 14.5 percent, Middle Atlantic 7.8 percent, Southern 6.7 percent; Increase: New England 8.3 percent.

5. Calendar 1963 sugar deliveries were larger to five of the seven industrial user groups than for 1962, and also larger for two of the non-industrial groups. To industrial buyers the national increase was 4.8 percent, and to non-industrial buyers 0.5 percent. The national total increase was 2.9 percent. Corn refiners' total domestic shipments of corn sirup and dextrose were up 8.7 percent.

Bulk blends <sup>4/</sup>	346	269	-	-	346	269

<sup>1/</sup> Sirup mixers outside of the corn refining industry, except cane sugar refiners and beet sugar processors; the latter two are included with "Miscellaneous food industries."

<sup>2/</sup> Due to rounding, totals may not be exact sums of individual items.

<sup>3/</sup> According to the Census of Manufacturers 1958, shipments of corn sirup solids were 63.7 percent of total shipments of miscellaneous refinery products. Since corn sirup solids contain up to 3.5 percent moisture, corn sirup solids dry basis, are estimated as 61.5 percent of shipments of miscellaneous refinery products as reported to the Sugar Division. For earlier treatment of this item see Sugar Reports 93, January 1960, Page 6.

<sup>4/</sup> Corn sirup unmixed sales to sugar refiners and beet sugar processors for blending contained in miscellaneous food industries.

NOTE: See Sugar Reports No. 93, January 1960, pages 6-10 for source, methodology and groupings.

<sup>1/</sup> Sirup mixers outside of the corn refining industry, except cane sugar refiners and beet sugar processors; the latter two are included with "Miscellaneous food industries."

<sup>2/</sup> Due to rounding, totals may not be exact sums of individual items.

<sup>3/</sup> According to the Census of Manufacturers 1958, shipments of corn sirup solids were 63.7 percent of total shipments of miscellaneous refinery products. Since corn sirup solids contain up to 3.5 percent moisture, corn sirup solids dry basis, are estimated as 61.5 percent of shipments of miscellaneous refinery products as reported to the Sugar Division. For earlier treatment of this item see Sugar Reports 93, January 1960, Page 6.

<sup>4/</sup> Corn sirup unmixed sales to sugar refiners and beet sugar processors for blending contained in miscellaneous food industries.

NOTE: See Sugar Reports No. 93, January 1960, pages 6-10 for source, methodology and groupings.

Table 24.- Sugar prices

Year and month	:	:	:	Refined beet sugar - quoted			
	:	Raw cane sugar-spot price:	Quota 3/	:	wholesale (gross) 4/		
	:	Domestic :	premiums :	:	:	:	
	:	sugar at N.Y. 1/	"World" 2/	:	Chicago-	Pacific	
	:	duty paid-:	sugar 2/	and :	Eastern :	West :	Coast
				discounts :			

1/ Spot prices during 1959-60 were for sugar in bags under Contract No. 6 plus .50 cent per pound duty (Cuban). Beginning with 1961, spot prices are for bulk sugar under Contract No. 7, the terms of which are duty paid or duty free.

2/ Spot prices during 1959-60 based on No. 4 Contract which was for bagged sugar f.a.s. Cuba. Beginning with 1961 spot prices are those under No. 8 Contract which is also for bagged sugar but f.o.b. and stowed at Greater Caribbean ports (including Brazil).

3/ For 1959-60 these amounts are the difference between the spot prices of the No. 6 "Domestic" Contract rolled back to Cuba (minus freight and insurance) and the spot prices of the No. 4 "World" Contract. Beginning with 1961 the No. 7 "Domestic Bulk" Contract has been adjusted by deducting (.625¢) computed freight from Greater Caribbean ports (including Brazil), insurance and unloading charges and adding the bag allowance (currently .055¢) before calculating the differential from No. 8 "World" Contract spot prices.

4/ These are basis prices in 100-pound paper bags, NOT delivered prices. To obtain delivered prices add "Freight Prepays" and deduct discounts and allowances. For illustration see Sugar Reports No. 81, January 1959, pages 5 to 9.

Last 12-month average	12.41	8.56	9.30	7.42	9.24	69	75	60	74

1/ Gross basis price in 100 pound bags subject to a 2 percent cash discount.

2/ Hydrate, in 100 pound bags.

3/ In drums, price in carload lots, except beginning February 1962 for less than carload lots. Quoted as 42 percent unmixed, except beginning March 1956, quoted as 43 percent unmixed.

4/ Assumes price is for 92 percent solids for dextrose and 80.3 percent solids for corn sirup. Thus, dry basis price is quoted price divided by 0.92 for dextrose and 0.803 for corn sirup.

Supplement to SUGAR STATISTICS, Volume II, for Mainland cane, Florida, Hawaii, Puerto Rico and Virgin Islands

This supplement brings to date Statistical Bulletin No. 244, "Sugar Statistics and Related Data," Volume II (revised), issued July 1963 as it relates to the Mainland cane Area, Florida, Hawaii, Puerto Rico, and the Virgin Islands. Some readers may want to transcribe the data appearing in this supplement to the tables in that bulletin. A cross-reference of the tables in this supplement to the corresponding tables in Volume II is shown below. Supplements to Volume II for Louisiana and the Domestic Beet Area appear in February and March 1964 issues of Sugar Reports, respectively.

Copies of S.B. 244 may be obtained upon request to the Information Division, Agricultural Stabilization and Conservation Service, U.S. Department of Agriculture, Washington, D.C., 20250.
